PROFESSIONAL SUMMARY

With over 5 years of experience, I specialize in building scalable, high-performance web applications using Ruby on Rails, React, and advanced database systems like PostgreSQL and MySQL. Skilled in microservices architecture, API integrations, and test-driven development, I deliver efficient, reliable, and client-focused solutions while mentoring teams and driving innovation.

PROJECTS

1. Digivizer

Sydney, Australia (Remote)

Role: Sr. Software Engineer

Responsibilities:

- Developed and maintained front-end web pages using React.js, Redux.
- Implemented graphs, charts and tables representing historical data for 1 year of date ranges.
- Enhanced reporting modules like Social, Paid, and Web performance, improving operational insights by 50%.
- Contributed on modules like Social, Paid, Search, Web performance, and Reporting, with Protocol Buffers for data exchange.
- Developed GraphQL APIs and implemented Protocol Buffers for seamless client communication, reducing payload sizes by 30%.
- Integrated over 7 paid ad providers' APIs like LinkedIn ads, Google ads, Meta ads, Bing ads, Twitter and many more and managed its version and schema changes and reduced the API failures by 90% within 3 months.

2. HandelNine

Lewes, Delaware (remote)

Role: Sr. Software Engineer

Responsibilities:

- Introduced Apache Kafka for real-time event-driven communication, increasing data processing reliability for 2M+ daily products.
- Designed and implemented cron jobs to reconcile inventory across platforms like eBay and Facebook Marketplace, boosting sync accuracy by 40%.
- Developed error notification systems, reducing failure recovery times by 25%.
- Optimized SQL queries to process large datasets of 2M products, reducing execution time by 30%.
- Customized Spree library behavior using monkey patching to meet unique e-commerce business needs.
- Implemented authorization at various roles to restrict user actions based on role.

3. Paved

New York, NY 10022(Remote)

Role: Software Engineer

Responsibilities:

- Integrated a private Ruby gem supporting 20+ Email Service Providers (e.g., MailChimp, SendGrid, MailJet), reducing implementation time by 50%.
- Built a common service class for streamlined API communication, ensuring consistent error handling and response structures.
- Enhanced platform security by implementing OTP-based Multi-Factor Authentication.

4. Hopin

UK(Remote)

Role: Software Engineer(Integration POD)

Responsibilities:

- Developed and maintained various features of the event platform.
- Created analytics dashboards, improving event performance tracking and engagement by 25%.
- Developed integrations for CRMs (e.g., Salesforce, HubSpot), reducing manual data processing by 40%.
- Collaborated on the development of frontend components using React.js, jQuery, and Bootstrap.
- Managed workflows using tools like Tray.io and Zapier, automating repetitive processes and reducing developer effort significantly.
- Implemented Sorbet for type checking, reducing runtime errors by 30%.

5. FeedOps

Adelaide, South Australia (Remote)

Role: Backend Engineer

Responsibilities:

- Led API integrations across marketplaces (e.g., Amazon, eBay), improving order and fulfillment workflows by 35%.
- Built features enabling live updates of products, orders and fulfillments, for high redundancy over platforms.
- Managed, scheduled, and monitored background tasks while ensuring efficiency, error handling, and security.
- Researched marketplace flows and designs to ensure a smooth and stable user experience.
- Engaged with Customers directly, migrated customer marketplaces, including their order histories and sales data, increasing customer retention.
- Implemented live chat between customers and admins using Rails Action Cable, reducing response times by 30%.

EXPERIENCE

1. Momentive Software (July 2025 - Present)

Pune, Maharashtra (Remote)

Responsibilities:

- Led the design, development, and maintenance of mission-critical Ruby on Rails applications and APIs, utilizing MVC, microservices, and domain-driven design (DDD) for scalability, performance, and security.
- Implemented React.js for front-end development and GraphQL for efficient data querying and high availability.
- Conducted thorough code reviews, leveraging tools like GitHub Actions and Codecov for automated testing and code quality analysis and mentoring junior developers to enhance their skills and productivity.

- Championed test-driven development (TDD) methodologies, implementing comprehensive test suites with RSpec and Capybara for robust and reliable software.
- Contributed to architectural design discussions and mentored junior developers.
- Acted as a technical authority, troubleshooting complex issues and utilizing advanced debugging techniques.

2. Tagline Infotech LLP (July 2020 - Present) ***Surat, Gujarat (Onsite)***

Responsibilities:

- Led the design, development, and maintenance of mission-critical Ruby on Rails applications and APIs, utilizing MVC, microservices, and domain-driven design (DDD) for scalability, performance, and security.
- Implemented React.js for front-end development and GraphQL for efficient data querying and high availability.
- Conducted thorough code reviews, leveraging tools like GitHub Actions and Codecov for automated testing and code quality analysis and mentoring junior developers to enhance their skills and productivity.
- Championed test-driven development (TDD) methodologies, implementing comprehensive test suites with RSpec and Capybara for robust and reliable software.
- Contributed to architectural design discussions and mentored junior developers.
- Acted as a technical authority, troubleshooting complex issues and utilizing advanced debugging techniques.

3. LogicUs Solutions (July 2019 - July 2020) ***Surat, Gujarat (Onsite)***

Responsibilities:

- Designed, developed, and maintained Ruby on Rails applications and APIs for high performance and security.
- Collaborated with cross-functional teams to deliver high-quality solutions on time and within budget.
- Enforced best practices and coding standards for clean, maintainable code.
- Conducted code reviews and provided feedback to improve code quality and consistency.
- Implemented test-driven development (TDD) for reliable and stable code.

TECHNICAL SKILLS

Programming Languages: Ruby, JavaScript, TypeScript, Design Patterns, Microservices, Redis
Frameworks : Ruby on Rails, Sidekiq, REST API design, Kafka, Sorbet, Elasticsearch, Kafka, React JS, jQuery, HTML5, CSS
Databases : RDBMS (MySQL, PostgreSQL, SQLite3) and MongoDB, BigQuery, Big Data Analytics
Version Control : Git, GitHub, Gitlab, Bitbucket for Projects, and RBENV & RVM for Ruby version.
Cloud Services : Docker, AWS, Google Cloud, Heroku, Kubernetes, DigitalOcean, Puma, Nginx, Linux OS, GCP, Azure.
Integrations : Third party APIs, GraphQL APIs, RESTful integration
Testing frameworks : Selenium, RSpec, Capybara, VCR, Unit Tests, Integration specs, System specs, Test-Driven Development
APM monitoring : Datadog, New Relic, Honeycomb, OpenTelemetry

EDUCATION

Bachelor in Computer Engineering (July 2016 - July 2020)

SSAIET, Gujarat Technological University ***Navsari, Gujarat***
